ET PROSJEKT VED
ADA EINMO J OG FRED ENDRESEN

“Vuömien tjuajah– The voices of the valley”

A site-specific choreographic soundscape, movement and land art project to re-habitate sámí language, thinking, understanding and perspective in a colonized landscape in Hemnes Municipality, Sami area, Norway. Placing several soundspots with specific sounds of sami language, glacier, yoik and nature into the huge and wild landscape of Laajroedurresne/Leirskardalen.

We invite people into this sound- and landscape to move, to find, experience, listen and reflect.
